REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In light of applicants' amendment of 5/26/05 the rejections of record have been overcome. The prior art neither teaches nor suggests a method for treating dysuria using a compound of formula (IV) as recited in the claims.

In particular, Chech. Patent 159330 discloses a naphthyl group at the position corresponding to R1 in applicants' claim 36 which is linked via an oxygen group to the rest of the structure. However, the last proviso in claim 36 recites that when R1 is naphthyl and R5 is H then X is not O. Therefore this compound is excluded. Further, there is no teaching or suggestion to modify any reference to obtain the claimed invention. Additionally, the closest prior art with respect to the other claims, were applicants priority document, required an additional linking group between the phenyl moiety and the $-\text{CH}(\text{OH})-\text{CH}-$.

The recited conditions treated, e.g., dysuria, pollakiruria, urinary incontinence, bladder dysfunction etc., using the claimed compounds were not taught in the prior art other than applicants' priority document.

Accordingly, claims 10-18 and 21-43, 46-48 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
